

Murendeni Gundo Malima

INFORMATION TECHNOLOGY STUDENT – SOFTWARE, DATA & NETWORK SYSTEMS

Phone: +27 79 894 3822**Email:** murendeni.malima@email.com
LinkedIn: linkedin.com/in/murendeni-gundo-malima-0b36282b0**GitHub:** github.com/murendeni
Location: Potchefstroom, South Africa

PROFILE

Third-year Bachelor of Science in Information Technology student at North-West University (Potchefstroom Campus), currently maintaining a cumulative GPA of 71.06% across 264 of 392 required credits. My coursework and project work span the full breadth of an IT generalist's toolkit: relational database design in Oracle SQL, object-oriented application development in C#, cross-platform mobile development with .NET MAUI, network infrastructure design in Cisco Packet Tracer, and foundational security operations through an IBM certification.

Beyond the classroom, I have served as a Student Assistant for the Department of Statistics, supporting fellow students through tutorials, marking and one-on-one consultation. I enjoy working in team-based project environments where I can take a system from a real-world brief through requirements analysis, design and implementation to a working, demonstrable product. I am currently looking for a graduate internship, vacation work, or a junior developer / IT support role where I can continue building on this foundation.

TECHNICAL SKILLS

Languages	C#, SQL (Oracle PL/SQL & T-SQL), HTML5, CSS3, JavaScript
Frameworks	.NET MAUI (cross-platform mobile), WinForms, MVVM architecture
Databases	Oracle SQL Developer, Microsoft SQL Server, relational schema design, normalization, data modelling
Networking & Security	Cisco Packet Tracer, LAN/VLAN design and segmentation, routing fundamentals, network budgeting, Information Security fundamentals, Security Operations Center (SOC) practice
Tools & Platforms	Visual Studio, Visual Studio Code, Git & GitHub, Windows, iTextSharp (PDF report generation)
Core Computer Science	Object-Oriented Programming, Data Structures & Algorithms, Systems Analysis & Design, Data Analytics, Discrete Mathematics, Artificial Intelligence fundamentals, Decision Support Systems
Other	Agile fundamentals, requirements gathering, technical report writing, cross-functional team collaboration

EDUCATION

Bachelor of Science in Information Technology North-West University – Potchefstroom Campus NQF Level 7 · Qualification Code 2DX-H01-N302P-FT · Progression: 264 of 392 credits	2024 – Present (Expected 2027)
– 2024 (Year 1) — Distinctions/high passes in Descriptive Statistics (75), Basic Mathematical Techniques (75), Intro to Statistical Inference I (71) and Financial Accounting Special (82). – 2025 (Year 2) — Distinctions/high passes in Understanding the Natural World (75, 91), Apps & Advanced UI Programming (76), Communication Skills (81), Object-Oriented Programming (79), Data Analytics 2 (82), Data Structures & Algorithms (70), Discrete Mathematics (80) and Problem Solving for Managers (71). – 2026 (Year 3, in progress) — Artificial Intelligence, Computer Networks, Databases, Advanced Databases, Decision Support Systems 1 & 2, IT Developments, Operating Systems.	
National Senior Certificate (NSC) Thengwe Secondary School – Vhembe East, Limpopo	2023
Qualified for Bachelor's degree admission. Achieved Distinctions in Tshivenda Home Language, Mathematics and Life Orientation, alongside passes in English First Additional Language, Physical Sciences, Accounting and Life Sciences.	

EXPERIENCE

Student Assistant — Data Analytics (CMPG222)

2026 – Present

North-West University

- Serve as demi (teaching assistant) in weekly Tuesday practical sessions in Lab G4-201, supporting the theory class and helping students work through practical exercises.
- Invigilate the weekly Friday multiple-choice quizzes held in Lab G4-201 at the start of the module's Friday class.
- Mark practical assignments and semester tests for the module, providing accurate and consistent assessment of student submissions.

Invigilator — Department of Statistics (STTN122)

Semester 2, 2025

North-West University

- Invigilated formal tests and examinations for STTN122, ensuring assessment conditions complied with university examination policy.
- Distributed and collected examination scripts, verified student attendance against class registers, and monitored the venue throughout each session.
- Upheld academic integrity by monitoring for irregularities and responding to candidate queries without compromising the fairness of the assessment.
- Completed post-assessment documentation and reported any incidents to the module coordinator.

PROJECTS

FitTrack — Cross-Platform Fitness Tracking App

Team Project

- Collaborated with a development team to design and build a cross-platform mobile fitness application from a single C# codebase, deployable to both Android and iOS.
- Contributed to features allowing users to log workouts, monitor progress over time, and set and track personal fitness goals.
- Helped structure the application using the MVVM (Model-View-ViewModel) pattern, keeping the user interface cleanly separated from the underlying application logic.
- Gained practical experience with .NET MAUI's cross-platform UI toolkit and the challenges of building for multiple device form factors from one codebase.

Stack: .NET MAUI · C# · MVVM · Cross-platform mobile (Android/iOS)

RehabSystem — Gender-Based Violence Case Management System

Team Project

- Developed a Windows desktop application to help organizations manage sensitive case information for gender-based-violence victims, including victim records, counsellor assignments, appointments and case status tracking.
- Designed and integrated a relational database to centralize victim, counsellor and case data that had previously been managed manually.
- Implemented automated PDF report generation using iTextSharp, allowing case workers to produce printable summaries of appointments and case records on demand.
- Built the application with a strong focus on data sensitivity and structured record-keeping, given the confidential nature of the information involved.

Stack: C# · WinForms · SQL · iTextSharp

Hotel Management Database — Aurelius Grand Imperial Hotels (DataForgers)

Team Project

- Worked as part of a six-person team ("Data Forgers") to analyse the operational and data-management challenges facing a hotel group and translate them into a formal database solution.
- Conducted a needs and requirements analysis covering bookings, guest records, room inventory, staff, payments and catering operations.
- Designed a normalized relational schema in Oracle SQL to replace fragmented, spreadsheet-based record-keeping across departments.
- Proposed real-time reporting capabilities and role-based access control to address data security concerns and reduce booking and reporting inconsistencies.

Stack: Oracle SQL Developer · Relational Database Design · Requirements Analysis

- Designed and configured a complete network in Cisco Packet Tracer for a business made up of three distinct sections – Reception, Design and Workshop.
- Used VLAN segmentation to keep each department's traffic logically isolated from the others while ensuring that every device across all three sections retained internet access.
- Compiled a reasonable, itemized hardware budget for real-world equipment (switches, routers, access points, printers, computers) capable of performing the same functions as the simulated network – deliberately keeping the budget separate from the simulation devices themselves.
- Practiced translating a business floor-plan and functional requirements into a working, isolated-yet-connected network topology.

Stack: Cisco Packet Tracer · VLANs · Network Segmentation · Budgeting

CERTIFICATIONS

Security Operations Center (SOC) in Practice

Issued May 2025

IBM

Practical, hands-on introduction to SOC analyst workflows – monitoring, detection and incident-response fundamentals.

SOFT SKILLS

LANGUAGES

Problem solving · Communication · Teamwork · English – Fluent
Analytical thinking · Time management · Adaptability · Tshivenda – Native / Home language
Attention to detail, developed through handling confidential case data
